

**Subject:**

Integration for the Opioid Dependence Treatment (ODT) Community Pharmacy Program is now available

**Content:**

Dear Pharmacist,

As you may be aware, the Opioid Dependence Treatment (ODT) Community Pharmacy Program went live in the PPA Portal on 1 August 2023.

The Department of Health and Aged Care and the PPA would like to sincerely thank pharmacies for their participation to date – almost 36,000 patients have received treatment via the PBS and over 1,750 pharmacies have been paid under the new ODT Community Pharmacy Program. This level of uptake highlights the ongoing commitment of community pharmacies to providing outstanding patient care.

The PPA is therefore pleased to advise that integration is now available for any interested software vendors to connect to the Program in order to send claims directly from their software to the PPA Portal. The following vendors have provided updates on their plan to integrate their software to allow claims to be submitted to the PPA Portal:

- **Autodose** – "[Autodose](#) has implemented an integration and is currently in the testing phase. They will contact their customers in the near future about the release."
- **idose** – "idose ODT dose management software will be fully integrated with PPA ODT program online claims"
- **Modeus (MethDA)** – "Modeus is proactively contacting their customers as updates become available. If you require urgent MethDA software assistance or would like to know more about the Modeus ODT program, contact Modeus [here](#)"
- **StrongRoom AI** – "Integrated PPA ODT claiming is now Live in StrongER! We are in the process of rolling out to all StrongER pharmacies over the next week. For more information on StrongER, please contact the team at [StrongRoom AI](#) or call 03 7065 4066".

Please ensure the Main Authorised Person has registered your pharmacy for the ODT Program in the PPA Portal prior to setting up integration within your software. Information on how to register for the Program or generate an API Key can be found in the user guides below:

- [ODT Community Pharmacy Program User Guide](#)
- [Integration and Generating an API Key.](#)

Kind Regards,
